Education

Georgia Institute of Technology

- B.S. Computer Science
- Graduation: May 2019
- GPA: 3.72

Skills

- **Languages:** Java, JavaScript, TypeScript, Python, C
- **Tools/Frameworks/Software:** Angular, React.js, Node.js, jQuery, Git, Github, Tableau, Cloud Foundry, Concourse CI, Amazon Web Services, Drupal
- **Databases:** MySQL, PostgreSQL, DB2

Experience

Software Engineering Intern | The Home Depot *Summer 2017*

- Created an application to detect allocation anomalies for inventory replenishment systems
- Handles multiple issue prioritization for thousands of anomalies from daily batch processes
- Displays historical trends with behavioral diagnostics and issue resolution functionality
- Implemented using predominantly Angular, SQL, Spring Boot & Java, and Pivotal Cloud Foundry

Projects

East Cobb Sports Website | Github *Summer 2017*

- Developed a proof of concept for a local business with major updates to the current website's UI and UX
- Created mobile and desktop friendly versions of the website using React.js and Material UI

SoundCloud Song Sorter | Github *Summer 2017*

- Updated an application I made a year ago to use React.js instead of jQuery for learning purposes
- Organizes a specific artist's songs by most favorites or most playbacks so listeners can find music they're more likely to enjoy because SoundCloud currently does not support this feature

Excel | Epic Intentions *Spring 2017*

- Developed an app for a nonprofit supporting programs for students with intellectual disabilities
- Supports automated mentor-mentee matching, content management capabilities, and database hosting which replaced the previous method of using Excel sheets with manual data entry
- Constructed database schemas, backend endpoints, and migrations with PostgreSQL, Node.js, and Sequelize ORM and created UI components using Handlebars, HTML, and Materialize CSS

Activities

Intelligent Transportation Systems | Research *Team Lead (August 2016 - Present)*

- Currently migrating new database information and developing a dashboard for bus managers to determine relevant bus bunching statistics through graphical and tabular visualizations
- Led a sub-team by holding regular team meetings, software learning sessions, and client demos

Epic Intentions *Student Developer (Spring 2017 - Present)*

- This organization aids non-profits by allowing students to undertake projects on their behalf
- Currently working on a team and using pro bono web development to create helpful applications

Georgia Tech Table Tennis Association *Vice President, Webmaster, & Safety Officer (2017)*

- Recruited players from student orientations, organized weekly club practices, attended budget meetings, and managed the club website while leading our B Team in regional NCTTA tournaments
- Won nomination for our club's Player of the Year Award

Awards

- 1st Place Overall, CS² Hackathon 2016
- 2nd Place in Best Use of Aladdin API, HackGT 2016
